Managers name: admin password: 111111

One Custom login information :

email: luoyangdxx@gmail.com password: 111111

Detail introduce:

In my homework, there are two type of user:

1. managers
2. customers

Both customers and managers have a special login page. The different bewteen them is that the customers can create account but managers only have one account.

Database Information:

Table: admin 1. id 2. admname 3. admpw

Table: category 1. cid 2. cname 3. fid

Table: members 1. id 2. email 3. pwd 4.nickname 5.address 6. city

Table: orderdetail 1. id 2. productid 3. productprice 4. prodcutname
5. time 6. category 7. productqty 8. special
9. oldprice 10. orderid

Table: orders 1. id 2. products 3. prodnum 4. price 5. address
6. shipment 7. pubtime 8. memberid 9. status

Table: payment 1. id 2. orderid 3. products 4. prodnum 5 payment

Table: Products 1. id 2. price 3. name 4. startdate 5. enddate
6. oldprice 7. picture

Extra Credit: I think I reach the require of
the keep track of what items are purchased together
